

Practice on the computer!
(K. Kopelousos, 2007)

- #1) Go to <http://Aplusmath.com>.
- #2) Choose the “flash cards” option in the menu on the left.
- #3) Under “Non-Java Flashcards”, choose Addition, Subtraction, Multiplication and Division with Negative Numbers. (It’s the 7th choice.)
- #4) Check both boxes under Addition and both boxes under Subtraction and each box under Multiplication and Division.
- #5) Turn the timer “on” or leave it “off” if you prefer.
- #6) Push the start button.
- #7) Work each problem and then enter the answer in the answer box.
- #8) The computer will keep score for you...how many you attempted and how many you got correct.

Number correct: _____

Number attempted: _____
